**Product Formulation for Emil from label**

Active Ingredient(s)	% by wt.
Sodium hypochlorite	0.0095 %

(6)

## **BACKGROUND:**

The registrant has submitted a label, Confidential Statements of Formula for the basic and four alternate formulations, and MRID 46590701 to provide a justification for wider limits and to provide an enforcement analytical method. The registrant has also provided a letter to withdraw the CSFs dated July 8, 2005 and to replace these CSFs with the ones dated July 21, 2005.

## **FINDINGS:**

1. The concentration of the active ingredient on the Confidential Statements of Formula (CSFs dated July 21, 2005) for the basic and alternate formulations is consistent with the label declaration. These CSFs supersede all previous CSFs for the respective formulations.
2. All ingredients are cleared for use in pesticidal formulations.
3. The wider certified limits are acceptable because of disproportionation of the active ingredient, product/package interactions, limitations in manufacturing capabilities.

## **RECOMMENDATIONS:**

1. Product Science Branch finds this submission in support of the registration of 5813-85 to be acceptable.
